Eric de Souza Tavares

Front-End Engineer | React, React Native & TypeScript

E-mail: erictavares35@gmail.com • Phone: +55 (75) 9 9195-2463

Portfolio GitHub LinkedIn

Professional Summary

Software Engineer with experience in Front-End and Mobile development using React, React Native, TypeScript, JavaScript, and Next.js. Strong background in web/mobile product evolution, Design Systems, Microfrontends, legacy modernization, API integrations, state management, performance optimization, and reusable component architecture.

Hands-on experience with React Query, TanStack Query, Redux, Context API, Axios, Tailwind CSS, Material UI, Expo, and WebSocket. Active in tech migrations, architecture improvements, automated testing, CI/CD, and code reviews, with daily support from AI tools (GitHub Copilot, Cursor, Claude, and OpenAI Codex). Currently studying to evolve as a Full Stack developer with .NET and C#, and also in mobile development with Flutter, targeting Front-End Engineer, Software Engineer, and Mobile Engineer opportunities.

Technical Skills

AI Coding: GitHub Copilot, Cursor, Claude, OpenAI Codex

Core Competencies: React, React Native, TypeScript, Next.js, Design Systems, Microfrontends, WebSocket, Performance Optimization, CI/CD, Code Review

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML, CSS/Sass, Tailwind CSS, Material UI, Styled Components, Bootstrap

Mobile: React Native, Expo, Ionic, Native Base, Push Notifications

State Management & Data Fetching: Redux, Context API, React Query, TanStack Query, Axios

Architecture & Development: Design Systems, Microfrontends, Component Architecture, Responsive Design, Refactoring, Clean Code, Performance Optimization

Backend: Node.js, Express.js, NestJS

APIs & Communication: REST APIs, API Routes, WebSocket

Testing & DevOps: Automated Testing, CI/CD, Git, GitHub, GitLab

Professional Experience

Software Engineer II — CredAluga (Jan/2026 – Present)

- **Stack:** Next.js, React, TypeScript, API Routes, Services Pattern, Design System.
- Built and evolved the Front-End Design System, increasing component reuse by **45%**.
- Delivered and migrated reusable components into a unified standard, reducing rework by **30%**.
- Helped launch new products (Wallet and CredPoupa), shortening MVP delivery cycles by **20%**.
- Refactored API communication using a Services pattern and Next.js API Routes, lowering integration failures by **25%**.
- Performed code reviews and architecture improvements to raise maintainability and delivery predictability.
- **Daily AI coding workflow with GitHub Copilot, Cursor, and Claude for faster prototyping, refactoring, and technical reviews.**

Software Engineer II — Grupo Via Máquinas (Sep/2025 – Jan/2026 • Temporary contract)

- **Stack:** React Native, Expo, TypeScript, TanStack Query, WebSocket.
- Led React Native + Expo migration from JavaScript to TypeScript, reaching **90%** typed code coverage.
- Led real-time chat implementation (text, audio, image) with WebSocket, improving perceived responsiveness by **35%**.
- Implemented pagination and caching with TanStack Query, reducing mobile data usage by **28%**.
- Upgraded React Native and Expo versions, reducing build/release incidents by **40%**.
- Managed build and deployment to Google Play Store, improving release cycle time by **30%**.
- **Used Copilot, Cursor, and Claude to support migration planning, debugging, and PR quality checks.**

Software Engineer II — Codgo.X (Dec/2023 – Sep/2025)

- **Stack:** React, TypeScript, Material UI, Microfrontends, React Query, CI/CD.

- Led migration of a legacy credit management system from ASPX to React + Microfrontends, reducing maintenance effort by **32%**.
- Built responsive and dynamic pages using React, TypeScript, and Material UI, raising internal usability score by **20%**.
- Optimized performance using React Hooks, reducing average page load time by **6%**.
- Managed state with Context API and React Query, lowering redundant API calls by **22%**.
- Contributed to automated tests and CI/CD pipelines, improving release stability.
- **Frequent use of AI tools (Copilot, Cursor, Claude) to accelerate delivery and improve code quality.**

Software Engineer II — Tracken (Aug/2023 – Dec/2023 • Temporary contract)

- **Stack:** React Native, REST APIs, Push Notifications, Play Store/App Store release.
- Migrated Angular + Ionic apps to React Native, improving UX and runtime performance.
- Implemented UX/UI enhancements in Tracken Vendedor and Tracken Operação apps.
- Configured push notifications and published apps to Google Play and Apple App Store.
- Integrated APIs from marketplaces such as Mercado Livre and Shopee.
- Developed label-printing feature for logistics workflows.

Software Engineer — Uuhuw Software House (Feb/2022 – Jun/2023)

- **Stack:** React, TypeScript, React Native, Redux, Context API, React Query, Axios.
- Migrated an international PHP system to React + TypeScript.
- Built the mobile version with React Native focused on accessibility and usability.
- Provided technical leadership and code quality improvements.
- Refactored performance-sensitive areas using React Hooks (useCallback, useMemo, memo).
- Managed global state with Redux and Context API.
- Integrated APIs with Axios and React Query.
